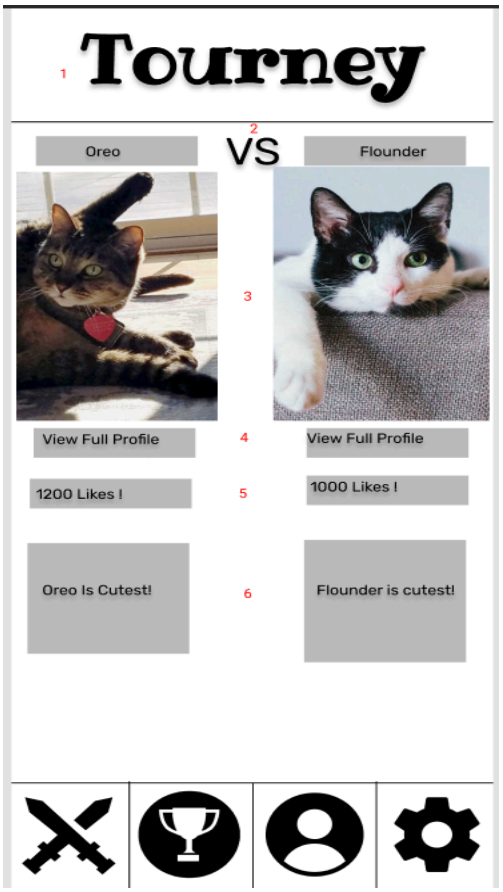
d

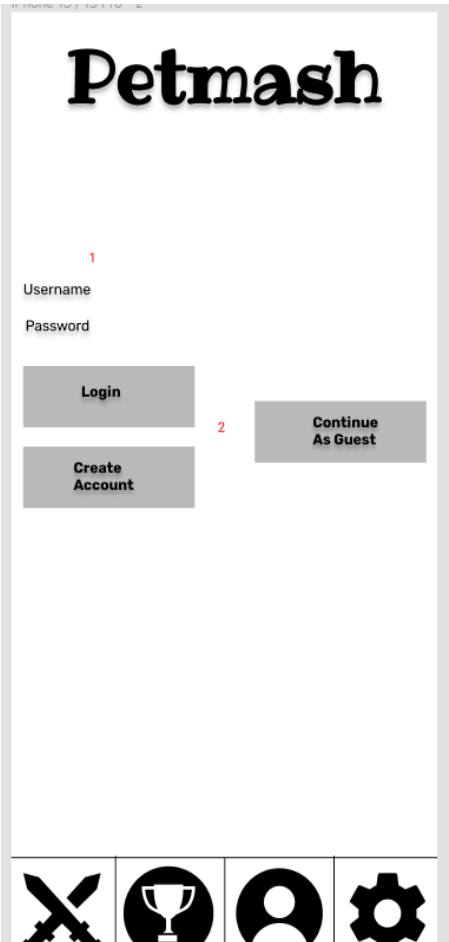
Add page for image approval

Brock



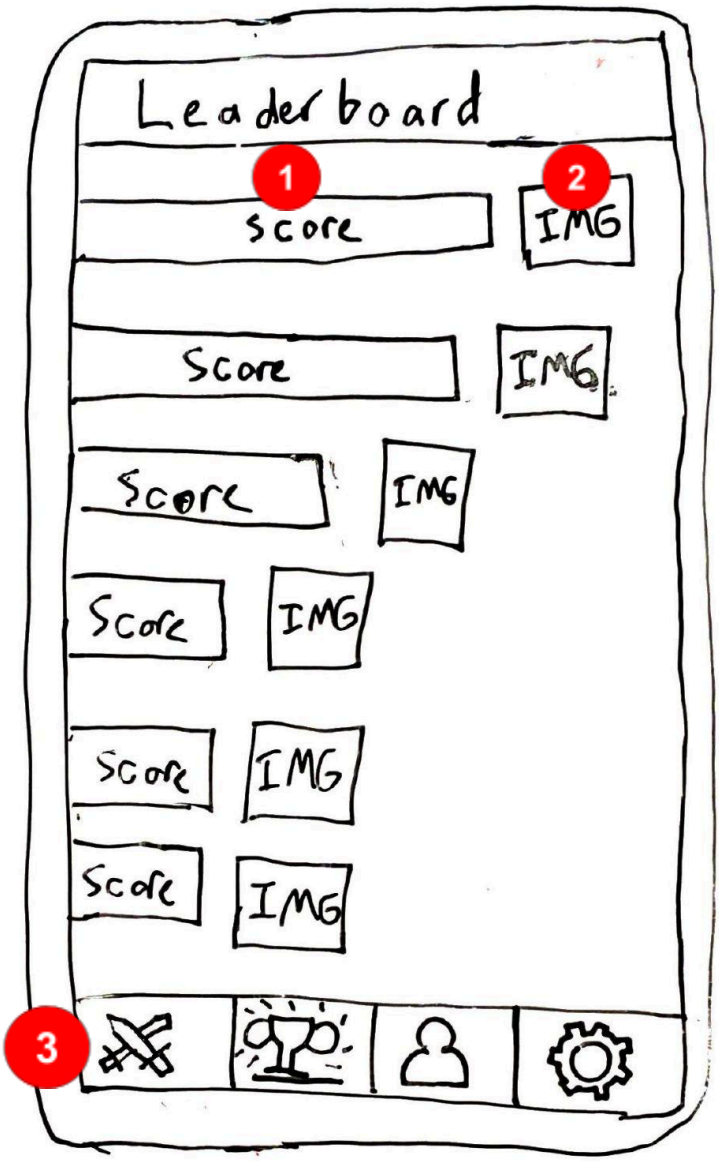
This page provides the user with the tournament page. The screen title is tourney (1) The names of the pets are displayed at (2) and their respective images are shown right below (3) Users can select to view the full profile with (4) and the number of likes is listed at (5) the cast vote button (6) displays the name of the pet so you do not get confused.

Brock



This is the Login page. Users are prompted to enter their user name and password in the field boxes (1) then have the choice to either continue as guest to use to app as non pet owner or can login to have their profile or create an account to register pets and continue that way (3)

Leaderboard Page

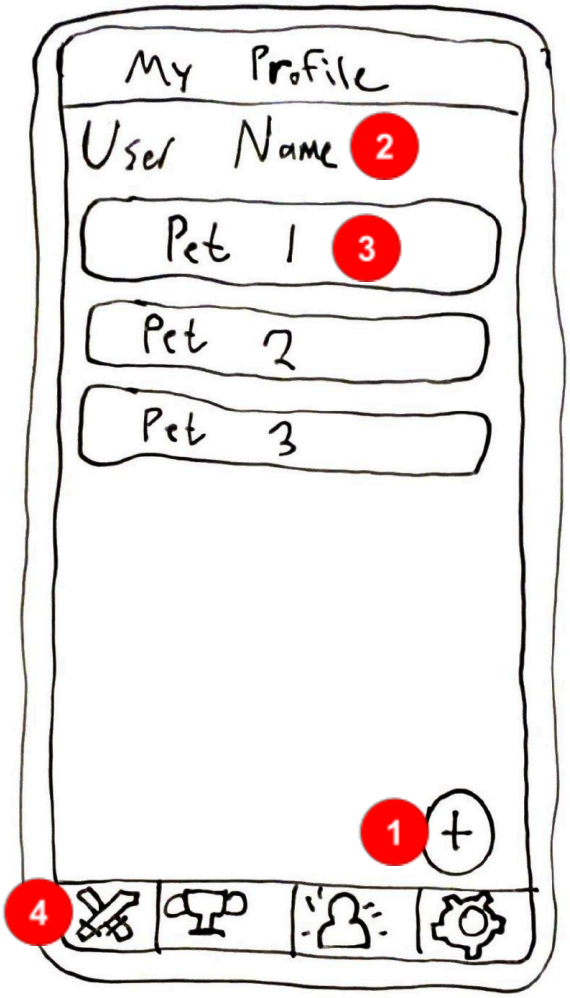


Joe Zuber

The purpose of this screen is to show the pet images with the highest scores. The page is intuitively structured so that the most-liked pet image is at the top, the second is one below that, the third is one below that, etc. The score bars (1) are scaled to the score each pet has and are labeled with the score each pet has. A small preview of each pet image (2) is given to the right of the score bar.

The selection bar at the bottom (3) allows the user to tab between this page, the settings page, the user (my profile) page, and the tournament page.

My Profile Page



Joe Zuber

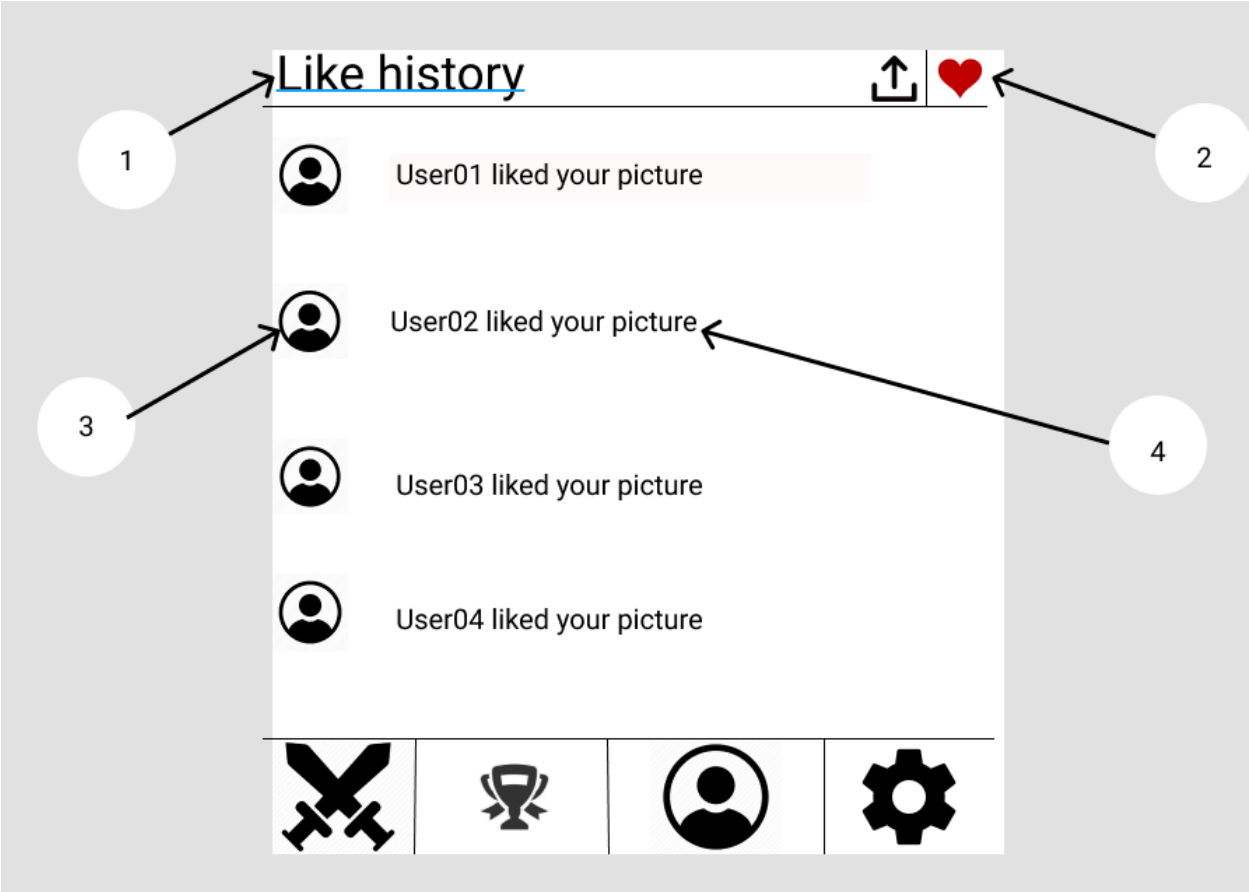
The purpose of this screen is to show the user their own profile, which includes the pets that they own. Clicking the plus button (1) in the bottom right, allows the user to add a new pet. Pressing this button sends the user to the pet creation page.

Beneath the user's name (2), the user's pets are displayed in the order at which they were added by the user. Their names are displayed on buttons (3) in the pet list. Pressing any of these buttons will open the pet page for the specified pet.

The selection bar at the bottom (4) allows the user to tab between this page, the settings page, the user (my profile) page, and the tournament page.

Add user report/delete button.

Like History - Youwon Song



The purpose of this screen page is to check my like history.

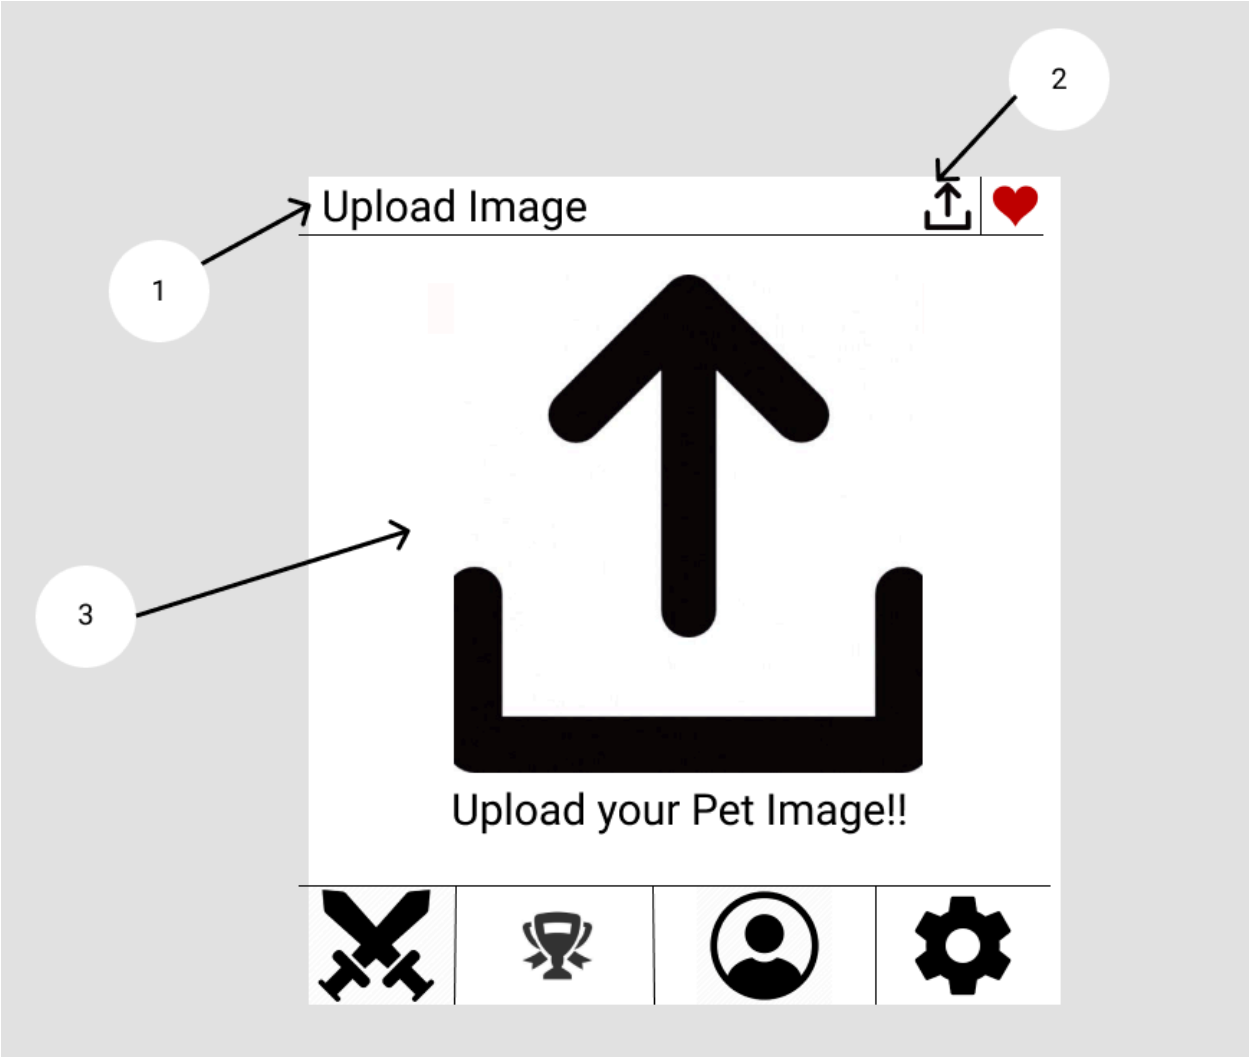
(1) It shows that it is a like history page and when it will go back to the previous page,

(2) It is a like icon which is linked to a like history page. When I hit that button, it will take you to like history page.

(3) It shows the profile of the user who liked your picture or picture that you pressed like button. If you press the user profile, it will lead you to the user profile page.

(4) It shows whether you pressed the like button or someone else pressed the like button. If you press the comment box, it will lead you to the user profile page as well.

Upload Pet Image - Youwon Song



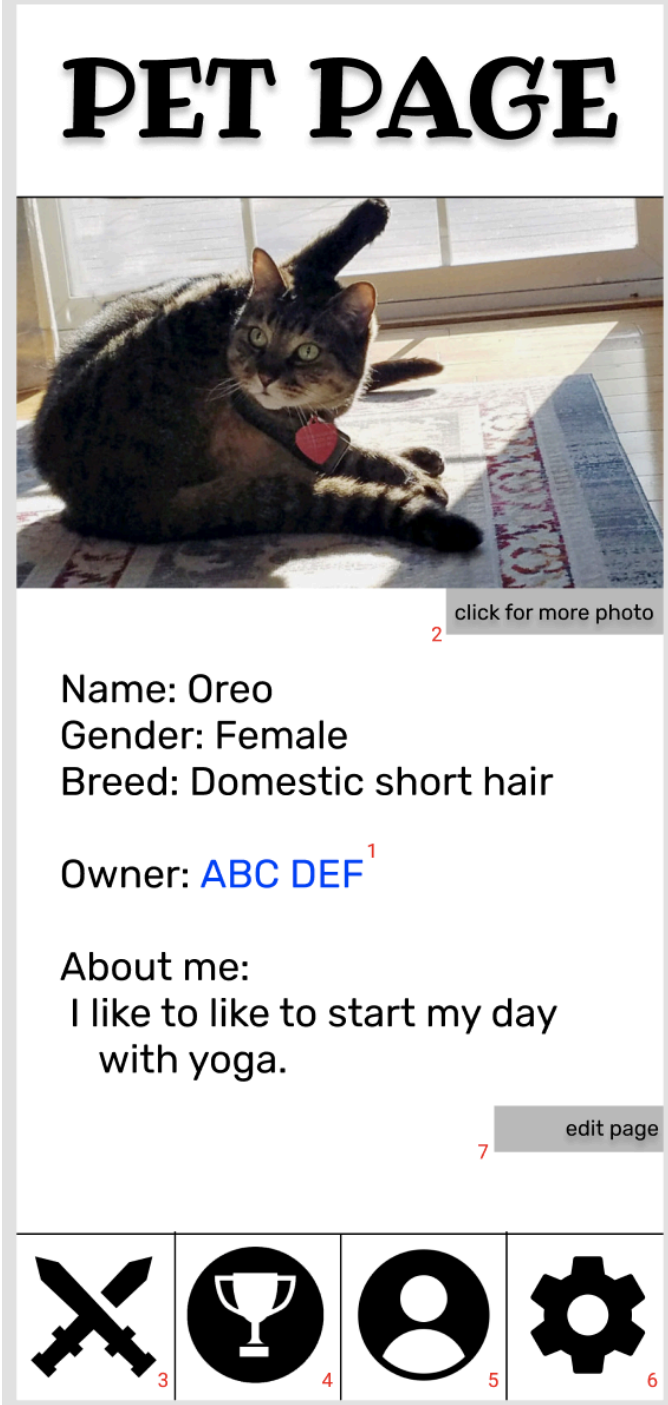
The purpose of this screen is to upload our own pet image.

(1) It shows that it is a upload pet image page and when it will go back to the previous page,

(2) It is the upload icon which is linked to the upload image page. When you click the button, it will lead you to the Upload Image page.

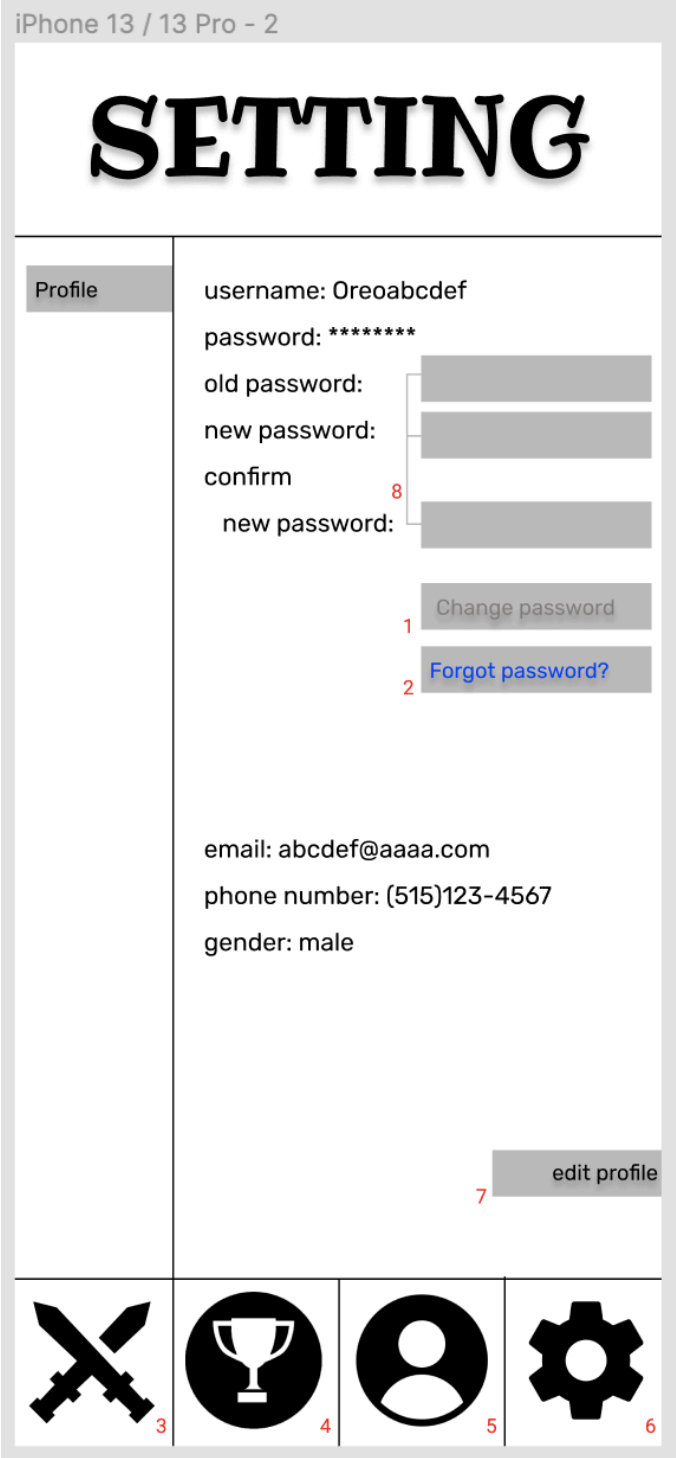
(3) It is a button to upload your own pet image. When you click that button, it will allow you to choose the picture that you want to upload.

iPhone 13 / 13 Pro - 1



1) Link to the Owner's Page. When clicked, the screen redirects to the Owner Page
2) Link to Pet Photos. When clicked, the screen pulls up more photos of the cat.
3) Tournament Page. When clicked, the screen will redirect to the Tournament Page where a user can select between two pets.
4) Link to the Leaderboard Page. When clicked, the screen will redirect to the Leaderboard Page where the rankings of the pets will be shown.
5) Link to the User Page. It will redirect to the User Page. The difference between this and the Owner link on the Pet Page is that this icon will show the user's page, whereas the link with the pet owner's name will redirect to the pet's owner's page.
6) Setting Page. The screen will redirect to the Setting Page, where a user can change the user profile, including the password.
7) Edit page button will grant the pet page's owner to change the information on the Pet Page.

Setting - Philip Choi



1) Change Password button. It will stay gray to indicate there are no new passwords entered. Once the user enters the old password and new password on the designated area, the button description will turn solid black.
2) Forgot password button. It will help the user to reset the password in case the user forgot the password, without the need of entering the old password.
3) Tournament Page. When clicked, the screen will redirect to the Tournament Page where a user can select between two pets.
4) Link to the Leaderboard Page. When clicked, the screen will redirect to the Leaderboard Page where the rankings of the pets will be shown.
5) Link to the User Page. It will redirect to the User Page. The difference between this and the Owner link on the Pet Page is that this icon will show the user's page, whereas the link with the pet owner's name will redirect to the pet's owner's page.
6) Setting Page. The screen will redirect to the Setting Page, where a user can change the user profile, including the password.
7) Edit profile button will let the user change their information, excluding password. Password change is handled separately.
8) Designated area to enter the old and new password in case of changing the password.
